

ALLIANCE INTERNATIONALE DES GENS & DES BASSINS

A group of people are gathered around a table in a tent, engaged in a discussion. The tent is decorated with stars on the ceiling. The scene is lit with a warm, golden light. The people are sitting on a raised platform, and some are looking at each other while talking. There are bottles and papers on the table. The background shows the interior of the tent with more people and a speaker on a stand.

**summary of the work carried out at
the Water Village in Melle & Brussels
(July & October 2024)**

Living conditions are deteriorating on the planet & life, including daily life, is becoming increasingly difficult & precarious. In the coming weeks & months, the social & environmental damage is likely to be intense, not to mention the political & geopolitical damage. Are we ready ?

National & international collectives, groups or friendly associations, we decided to make a toolbox that can be used in situations & fights here & elsewhere. With it, we intend to support & protect fights, struggles, market gardening, occupations, canteens, associations, collectives, those already there, those to come. Protect the people, structures & means of work of those who, like us, want delay the end of the world by inventing another one. In a pragmatic & direct way, by linking social & ecological, by converging between small & large, by associating Norths & Souths.

GENERAL IDEA

- **Building a common toolbox, on a shared political basis, beyond borders of any kind**
- **Save time, resources, inform ourselves & protect each other**

GOAL : WEAVE A NETWORK

- **By catchment area, hydrological area, etc.**
- **Of political trust**
- **Sharing operational modalities**
- **Activation when emergency occurs**
- **Of solidarity & strength**

MEANS

(NON EXHAUSTIVE LIST) :

- **A catalogue of practices** for “making a country”, living & strengthening ourselves in our struggles for a livable world, for all living things
- **Legal means** for the fight (foreigners’ rights, legal teams, anti-repression, etc.), but also medical, social, places of reception & rest, etc.
- **Secure digital networks** to keep us informed between groups
- **Communist funds** everywhere, where allies (individuals & legal entities) contribute (even modestly) on a regular basis & a capacity to pool the resources of different funds where appropriate (urgent cases, strategic cases)
- **Activities that allow us to “save money”** to support our initiatives & our struggles
- **An (informal) mapping** of the resources that each organization can mobilize
- **Provide support for actions** on the ground to the collectives of the Souths (Brazil, Colombia, Mexico, Rojava, Lebanon, Senegal, etc.) & multiply their impact elsewhere on the planet. We are intrinsically linked & connected
- **Build some networks of doing & knowledgemade** up of people with the trades, skills or experience to intervene technically or intellectually where their knowledge is required
- **Support those who cultivate the land** to feed those who will find it increasingly difficult to cope with social cuts. Feeding today is a political goal
